Heat applied FILM for textiles

FLEX FILM

ProFLEX PU

ROLLS 25m x 50cm

ProFlex PU is a polyurethane film for transfer on to cotton, polyester, lycra, acrylic and some nylons. The raw materials are inert, free of PVC and heavy metals. Easy to cut and weed. The film has been specially produced with an adhesive carrier which enables small detail cutting. Once applied a thin comfortable aspect can be expected. Film has excellent washing capacity.

ProFLEX Special

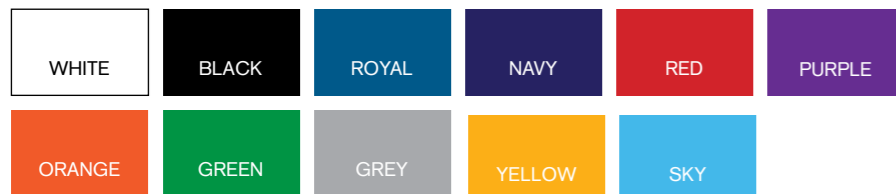

ROLLS 25m x 50cm

ProFlex PVC and SPECIAL range have non adhesive carriers that suit the cutting of big numbers, letters and logos also featuring fast and easy weeding. The film has high covering power when transferred to textiles such as cotton, acrylics, polyester - SPECIAL is distinguished by neon colours plus gold and silver.

ProFLEX PVC

ROLLS 25m x 50cm

REFLECTIVE

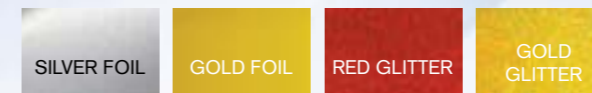

ROLLS 25m x 50cm

Computer cut film for marking of safety vests emergency and security uniforms. Markings reflect from various light sources.

ProFLEX PLUS

ROLLS 25m x 50cm

A fashion range featuring foils and sparkles. (Colours not possible with traditional screen printing) Thanks to its slightly sticky back, the ProFLEX PLUS is appropriate for small and medium sized logos. Higher cutting pressure is required for easy weeding. PLUS requires special care when washing.

PRINT FILM

ProPRINT

ROLLS 25m x 50cm

White satiny film, suitable on light and dark textiles

ProPrint and ProPrint CLEAR are polyurathane products - these films have been developed for wide format solvent printing. ProPrint films have been tested compatible with quality solvent inks. The film has excellent cutting and weeding aspects and combines superb with our application film "TransTape". ProPrint has good washing resistance, a soft touch, insuring a wearing comfort.

ProPRINT Clear

ROLLS 25m x 50cm

Transparent film, suitable only on light textiles

TatooSTRETCH

ROLLS 25m x 50cm

TATOO brand stretch film is a new product. Ideal for garments such as Lycra that need movement. The film cuts and weeds efficiently. Note... Tatoo has its own special application tape.

SubBLOCK

ROLLS 20m x 50cm

Sub BLOCK print film is specially formulated. The film has a thin inner layer that retards the migration of sublimation particals. Light coloured logos etc are protected against a stained colour change.

TAPE

TransTAPE

ROLLS 50m x 50cm

TransTAPE has a sticky inner film, when applied it can then remove design from its carrier film. Once removed the design is ready to heat apply.

TatooTAPE

ROLLS 50m x 50cm

TatooTAPE has a sticky inner film, when applied it can then remove design from its carrier film. Once removed the design is ready to heat apply.

FLOCK FILM

VelCUT

ROLLS 10m x 50cm

VelCut flock film has a high density of fibres creating a velvet aspect. The non-adhesive carrier allows for easy cutting and weeding. Flock adds a fashionable addition to T-shirts and Textiles. Good washing properties.

WHITE	BLACK	ROYAL	NAVY
ROUGE RED	YELLOW	AZURE	SKY
